Assistant-President T. M. R. Taicott, of the Seaboard Air-Line, stated yesterday that work on the Richmond, Petersburg and Carolina bridge at this city would begin just as soon as the Secretary of War gave the necessary permit. Under the Pederal statutes no bridge can be put across navigable streams without the Secretary of War's permission. This has been sought in the case of the bridge here, but the request has not been acted upon

At the directors meeting last year there was a strong sentiment in favor of deciaring a dividend, but this was overruled. It was thought likely that a dividend could not be maintained.

At the close of the fiscal year, June 20, 1888, there was a surplus on hand of about \$620,000, or 1 per cent, of the capital stock. The business of the road during the past twelve months has had some ups and downs so far as receipts are concerned, but on the whole, the year has been a fine one. It is believed the surplus from the fiscal year just ended will be shown to be much larger, proportionately, than that of last year.

The latter said that if the farmers would only interest themseives chough in the matter to raise the sugar-beet there would be no difficulty in erecting a plant for the manuacture of sugar, This industry is now being actively and

The raising of spring lambs for the New York markets, says Commissioner Koiner, is as profitable a pursuit as the larmer can engage in. In the early spring the demand for lambs in the great metropolis, as well as in other large cities between here and New York, is greater than the supply, and the result is, that the very best prices are obtained, and there is no trouble in selling. now exhibited through the magnanim instrumentality of the Cohen Company, at their store free to the Richmond pub-

The figures represented therein are life size, with Christ in the centre of the group of brutal Roman soldiers, who are stripping His garments from His bruised form; His hands stretched out as making a complete sur-render, with looks of that majesty in His face that makes the conception as striking and powerful as it is original.

The group of sorrowing women, whose faces are full of pity, are on the left, while the faces of the soldlers show eager intensity to finish their work of execution. One feels almost like hurry-
